For whatever reason my feed server stopped working yesterday. So here are all the sleep image related tags I found on the internet:Q: Python import error when using alias to name a module I have a python module named "triangle" that was defined using a class in another.py file. When I imported it from another module using "from triangle import Triangle", I got an error saying "ModuleNotFoundError: No module named 'triangle'" However when I used the following code, the error went away. import os import sys import keyword import from. import Triangle My question is, why would "import triangle" lead to no module named 'triangle' but "from triangle import Triangle" works fine? A: You imported triangle instead of from triangle import Triangle. If you want to refer to the module you imported, you should use: from triangle import Triangle from triangle import Triangle as T Obama praises Booker for Muslim upbringing DETROIT (AP) - President Barack Obama has praised Cory Booker, a Newark, New Jersey, mayor who's running for president, for being "a Muslim with a Muslim name." The president made the comment Saturday in a speech in Detroit, where Booker is campaigning. In Detroit, Booker said he's running for president to bring a fresh perspective to the nation's problems. He also told the gathering that the president was right in the 1960s to challenge the status quo and "to bring a new lens to our nation." Booker's parents are from Guyana. His mother is white and his father is black and Muslim. The president recalled meeting Booker's father when he was working at a mental hospital. "A couple years later, his dad was on the front lines of the civil rights movement," Obama said. "And they had the respect that came with being honest
